| # | TEST                                                                     | TIME  |
|---|--------------------------------------------------------------------------|-------|
| 1 | ✓ G1 long duration (req I) shows OIM offshore and Process TA onshore     | 4.9 s |
| 2 | ✓ G2 one shift (req IIA) shows OIM offshore and Process Engineer onshore | 4.8 s |
| 3 | ✓ G3 long duration (req IIA) shows Department Head offshore only         | 4.6 s |
| 4 | ✓ G3 one shift (req IIB) shows Area Authority offshore only              | 4.4 s |
| 5 | ✓ non-hazardous (G4) deviation does not require OIM                      | 4.0 s |
| 6 | ✓ compliant isolation shows no authorisation guidance                    | 3.8 s |

| #  | TEST                                                                                                                              | TIME  |
|----|-----------------------------------------------------------------------------------------------------------------------------------|-------|
| 1  | ✓ CSE controls: complete separation + TUK procedure reference                                                                     | 2.8 s |
| 2  | ✓ controlsHeading says "required" when isolation meets standard                                                                   | 2.6 s |
| 3  | ✓ controlsHeading says "Suggested controls" when isolation does not meet standard                                                 | 2.4 s |
| 4  | ✓ Standard controls — proven valve Group 1, proven valve → pressure test + monitoring + gas + contingency + radio                 | 4.2 s |
| 5  | ✓ Standard controls — proven valve Group 2, proven valve → same 5 controls as Group 1                                             | 4.4 s |
| 6  | ✓ Standard controls — proven valve Group 3, proven valve → pressure test + monitoring + contingency (no gas/radio)                | 3.0 s |
| 7  | ✓ Standard controls — proven valve Group 4, proven valve → same 3 controls as Group 3                                             | 3.6 s |
| 8  | ✓ Standard controls — single valve (non-proven) Group 1, single valve → monitoring + gas + contingency + radio (no pressure test) | 3.9 s |
| 9  | ✓ Standard controls — single valve (non-proven) Group 3, single valve → monitoring + contingency only                             | 3.6 s |
| 10 | ✓ Hot work control appended Group 1, proven valve, hot work → 5 standard + hot work = 6 controls                                  | 2.6 s |
| 11 | ✓ Hot work control appended Group 3, proven valve, hot work → 3 standard + hot work = 4 controls                                  | 2.8 s |
| 12 | ✓ Hot work control appended Group 1, single valve, hot work → 4 standard + hot work = 5 controls                                  | 3.2 s |
| 13 | ✓ Hot work control appended hot work NOT added when CSE applies (CSE controls only)                                               | 3.2 s |
| 14 | ✓ SBT controls SBT + proven valve → 6 SBT controls including pressure test                                                        | 3.0 s |
| 15 | ✓ SBT controls SBT + single valve → 5 SBT controls (no pressure test)                                                             | 3.0 s |
| 16 | ✓ SBT controls SBT + proven valve + hot work → 7 controls (6 SBT + hot work)                                                      | 3.3 s |
| 17 | ✓ SBT controls SBT + single valve + hot work → 6 controls (5 SBT + hot work)                                                      | 3.6 s |
| 18 | ✓ Flare/vent/drains controls FVD + single valve → all 6 FVD controls including single-valve briefing                              | 2.7 s |
| 19 | ✓ Flare/vent/drains controls FVD + proven valve → 5 FVD controls (single-valve briefing omitted)                                  | 2.8 s |
| 20 | ✓ Flare/vent/drains controls FVD + single valve + hot work → 7 controls                                                           | 3.1 s |
| 21 | ✓ Flare/vent/drains controls FVD + proven valve + hot work → 6 controls                                                           | 3.2 s |
| 22 | ✓ Preparation requirements Groups 1-3 get all 4 preparation controls including water flush and nitrogen purge                     | 8.0 s |
| 23 | ✓ Preparation requirements Group 4 only gets 2 preparation controls (no water flush or nitrogen purge)                            | 2.7 s |

| #  | TEST |                                                                                | TIME  |
|----|------|--------------------------------------------------------------------------------|-------|
| 1  | ✓    | hot work does NOT escalate groups 3 and 4                                      | 2.8 s |
| 2  | ✓    | twin seal valve maps to Category IIA same as DBB                               | 3.0 s |
| 3  | ✓    | Group/duration/hot-work decision table g1 oneOrLess hw=false iso=dbb           | 3.4 s |
| 4  | ✓    | Group/duration/hot-work decision table g1 oneOrLess hw=false iso=twin_seal     | 3.7 s |
| 5  | ✓    | Group/duration/hot-work decision table g1 oneOrLess hw=false iso=sbb           | 3.5 s |
| 6  | ✓    | Group/duration/hot-work decision table g1 oneOrLess hw=false iso=single        | 2.6 s |
| 7  | ✓    | Group/duration/hot-work decision table g1 oneOrLess hw=true iso=dbb            | 3.1 s |
| 8  | ✓    | Group/duration/hot-work decision table g1 oneOrLess hw=true iso=twin_seal      | 3.4 s |
| 9  | ✓    | Group/duration/hot-work decision table g1 oneOrLess hw=true iso=sbb            | 3.3 s |
| 10 | ✓    | Group/duration/hot-work decision table g1 oneOrLess hw=true iso=single         | 2.2 s |
| 11 | ✓    | Group/duration/hot-work decision table g1 moreThanShift hw=false iso=dbb       | 2.5 s |
| 12 | ✓    | Group/duration/hot-work decision table g1 moreThanShift hw=false iso=twin_seal | 2.5 s |
| 13 | ✓    | Group/duration/hot-work decision table g1 moreThanShift hw=false iso=sbb       | 3.7 s |
| 14 | ✓    | Group/duration/hot-work decision table g1 moreThanShift hw=false iso=single    | 3.5 s |
| 15 | ✓    | Group/duration/hot-work decision table g1 moreThanShift hw=true iso=dbb        | 3.1 s |
| 16 | ✓    | Group/duration/hot-work decision table g1 moreThanShift hw=true iso=twin_seal  | 3.0 s |
| 17 | ✓    | Group/duration/hot-work decision table g1 moreThanShift hw=true iso=sbb        | 3.5 s |
| 18 | ✓    | Group/duration/hot-work decision table g1 moreThanShift hw=true iso=single     | 3.6 s |
| 19 | ✓    | Group/duration/hot-work decision table g2 oneOrLess hw=false iso=dbb           | 3.4 s |
| 20 | ✓    | Group/duration/hot-work decision table g2 oneOrLess hw=false iso=twin_seal     | 3.3 s |
| 21 | ✓    | Group/duration/hot-work decision table g2 oneOrLess hw=false iso=sbb           | 3.2 s |
| 22 | ✓    | Group/duration/hot-work decision table g2 oneOrLess hw=false iso=single        | 4.0 s |
| 23 | ✓    | Group/duration/hot-work decision table g2 oneOrLess hw=true iso=dbb            | 4.0 s |
| 24 | ✓    | Group/duration/hot-work decision table g2 oneOrLess hw=true iso=twin_seal      | 3.3 s |
| 25 | ✓    | Group/duration/hot-work decision table g2 oneOrLess hw=true iso=sbb            | 2.5 s |
| 26 | ✓    | Group/duration/hot-work decision table g2 oneOrLess hw=true iso=single         | 2.5 s |
| 27 | ✓    | Group/duration/hot-work decision table g2 moreThanShift hw=false iso=dbb       | 3.6 s |
| 28 | ✓    | Group/duration/hot-work decision table g2 moreThanShift hw=false iso=twin_seal | 3.6 s |
| 29 | ✓    | Group/duration/hot-work decision table g2 moreThanShift hw=false iso=sbb       | 3.2 s |
| 30 | ✓    | Group/duration/hot-work decision table g2 moreThanShift hw=false iso=single    | 2.9 s |
| 31 | ✓    | Group/duration/hot-work decision table g2 moreThanShift hw=true iso=dbb        | 3.1 s |
| 32 | ✓    | Group/duration/hot-work decision table g2 moreThanShift hw=true iso=twin_seal  | 3.5 s |
| 33 | ✓    | Group/duration/hot-work decision table g2 moreThanShift hw=true iso=sbb        | 3.7 s |
| 34 | ✓    | Group/duration/hot-work decision table g2 moreThanShift hw=true iso=single     | 3.5 s |
| 35 | ✓    | Group/duration/hot-work decision table g3 oneOrLess hw=false iso=dbb           | 2.8 s |
| 36 | ✓    | Group/duration/hot-work decision table g3 oneOrLess hw=false iso=twin_seal     | 2.9 s |
| 37 | ✓    | Group/duration/hot-work decision table g3 oneOrLess hw=false iso=sbb           | 2.9 s |
| 38 | ✓    | Group/duration/hot-work decision table g3 oneOrLess hw=false iso=single        | 3.0 s |
| 39 | ✓    | Group/duration/hot-work decision table g3 oneOrLess hw=true iso=dbb            | 3.0 s |

| #  | TEST |                                                                                | TIME  |
|----|------|--------------------------------------------------------------------------------|-------|
| 40 | ✓    | Group/duration/hot-work decision table g3 oneOrLess hw=true iso=twin_seal      | 3.2 s |
| 41 | ✓    | Group/duration/hot-work decision table g3 oneOrLess hw=true iso=sbb            | 3.2 s |
| 42 | ✓    | Group/duration/hot-work decision table g3 oneOrLess hw=true iso=single         | 3.2 s |
| 43 | ✓    | Group/duration/hot-work decision table g3 moreThanShift hw=false iso=dbb       | 2.8 s |
| 44 | ✓    | Group/duration/hot-work decision table g3 moreThanShift hw=false iso=twin_seal | 2.7 s |
| 45 | ✓    | Group/duration/hot-work decision table g3 moreThanShift hw=false iso=sbb       | 2.9 s |
| 46 | ✓    | Group/duration/hot-work decision table g3 moreThanShift hw=false iso=single    | 3.0 s |
| 47 | ✓    | Group/duration/hot-work decision table g3 moreThanShift hw=true iso=dbb        | 2.9 s |
| 48 | ✓    | Group/duration/hot-work decision table g3 moreThanShift hw=true iso=twin_seal  | 3.0 s |
| 49 | ✓    | Group/duration/hot-work decision table g3 moreThanShift hw=true iso=sbb        | 2.7 s |
| 50 | ✓    | Group/duration/hot-work decision table g3 moreThanShift hw=true iso=single     | 2.8 s |
| 51 | ✓    | Group/duration/hot-work decision table g4 oneOrLess hw=false iso=dbb           | 2.7 s |
| 52 | ✓    | Group/duration/hot-work decision table g4 oneOrLess hw=false iso=twin_seal     | 2.9 s |
| 53 | ✓    | Group/duration/hot-work decision table g4 oneOrLess hw=false iso=sbb           | 2.6 s |
| 54 | ✓    | Group/duration/hot-work decision table g4 oneOrLess hw=false iso=single        | 2.9 s |
| 55 | ✓    | Group/duration/hot-work decision table g4 oneOrLess hw=true iso=dbb            | 3.0 s |
| 56 | ✓    | Group/duration/hot-work decision table g4 oneOrLess hw=true iso=twin_seal      | 2.9 s |
| 57 | ✓    | Group/duration/hot-work decision table g4 oneOrLess hw=true iso=sbb            | 3.0 s |
| 58 | ✓    | Group/duration/hot-work decision table g4 oneOrLess hw=true iso=single         | 2.7 s |
| 59 | ✓    | Group/duration/hot-work decision table g4 moreThanShift hw=false iso=dbb       | 2.7 s |
| 60 | ✓    | Group/duration/hot-work decision table g4 moreThanShift hw=false iso=twin_seal | 2.8 s |
| 61 | ✓    | Group/duration/hot-work decision table g4 moreThanShift hw=false iso=sbb       | 3.0 s |
| 62 | ✓    | Group/duration/hot-work decision table g4 moreThanShift hw=false iso=single    | 3.1 s |
| 63 | ✓    | Group/duration/hot-work decision table g4 moreThanShift hw=true iso=dbb        | 3.0 s |
| 64 | ✓    | Group/duration/hot-work decision table g4 moreThanShift hw=true iso=twin_seal  | 2.9 s |
| 65 | ✓    | Group/duration/hot-work decision table g4 moreThanShift hw=true iso=sbb        | 2.7 s |
| 66 | ✓    | Group/duration/hot-work decision table g4 moreThanShift hw=true iso=single     | 2.8 s |

### Driver Highlight

All passed

9 tests — 9 passed

| # | TEST |                                                                              | TIME  |
|---|------|------------------------------------------------------------------------------|-------|
| 1 | ✓    | CSE drives → outCSE is highlighted red and bold                              | 2.7 s |
| 2 | ✓    | positivelsoRisk=no drives → outPoslsoRisk is highlighted                     | 2.8 s |
| 3 | ✓    | hotWork drives (G1, short) → outHotWork is highlighted                       | 2.8 s |
| 4 | ✓    | boundary drives → outBound is highlighted                                    | 2.7 s |
| 5 | ✓    | long duration drives (G3) → outDur is highlighted                            | 3.0 s |
| 6 | ✓    | fluid group/substance drives (G1, short, no hotwork) → outSub is highlighted | 2.9 s |
| 7 | ✓    | FVD drives → outExempt is highlighted                                        | 2.6 s |
| 8 | ✓    | SBT drives → outExempt is highlighted                                        | 2.8 s |
| 9 | ✓    | only one cell is highlighted as driver at a time                             | 2.9 s |

| #  | TEST |                                                                            | TIME  |
|----|------|----------------------------------------------------------------------------|-------|
| 1  | ✓    | CSE forces Category I regardless of group                                  | 2.7 s |
| 2  | ✓    | CSE hides the isolation picker and shows CSE notice                        | 2.4 s |
| 3  | ✓    | flare/vent/drains gives Category III                                       | 2.7 s |
| 4  | ✓    | SBT: groups 1 & 2 → IIB                                                    | 2.7 s |
| 5  | ✓    | SBT: groups 3 & 4 → III                                                    | 2.6 s |
| 6  | ✓    | boundary isolation → Category III                                          | 2.6 s |
| 7  | ✓    | CSE wins over boundary (precedence)                                        | 3.0 s |
| 8  | ✓    | CSE wins over flare/vent/drains (precedence)                               | 2.9 s |
| 9  | ✓    | boundary takes priority over flare/vent/drains                             | 3.4 s |
| 10 | ✓    | positivelsoRisk=no takes priority over CSE (positivelsoRisk checked first) | 3.7 s |

| #  | TEST                                                                                                         | TIME  |
|----|--------------------------------------------------------------------------------------------------------------|-------|
| 1  | ✓ "Other" fluid uses the manually entered group                                                              | 3.3 s |
| 2  | ✓ "Other" fluid group 4 can be escalated by temperature                                                      | 3.0 s |
| 3  | ✓ <b>Named fluid groups</b> Natural Gas → Group 1                                                            | 2.2 s |
| 4  | ✓ <b>Named fluid groups</b> NGL → Group 1                                                                    | 3.2 s |
| 5  | ✓ <b>Named fluid groups</b> Crude Oil → Group 1                                                              | 2.6 s |
| 6  | ✓ <b>Named fluid groups</b> Methanol → Group 2                                                               | 3.4 s |
| 7  | ✓ <b>Named fluid groups</b> CRW85733 → Group 2                                                               | 3.4 s |
| 8  | ✓ <b>Named fluid groups</b> Proxel XL2 → Group 2                                                             | 2.8 s |
| 9  | ✓ <b>Named fluid groups</b> GT-7511 → Group 2                                                                | 2.9 s |
| 10 | ✓ <b>Named fluid groups</b> Corrtreat 15340 → Group 2                                                        | 2.9 s |
| 11 | ✓ <b>Named fluid groups</b> Biotreat 4632 → Group 2                                                          | 2.8 s |

| 31 | ✓ <b>Temperature boundary cases</b> exactly -10°C escalates to Group 3 (boundary: $t \geq -10$ and $t < 0$ ) | 3.1 s |
| 32 | ✓ <b>Temperature boundary cases</b> -11°C escalates to Group 1                                               | 3.2 s |
| 33 | ✓ <b>Temperature boundary cases</b> temperature never downgrades a more onerous base group                   | 3.0 s |

## Gating All passed

3 tests — 3 passed

| # | TEST                                                          | TIME  |
|---|---------------------------------------------------------------|-------|
| 1 | ✓ major accident answer defers to shutdown                    | 1.5 s |
| 2 | ✓ practicable to wait for shutdown defers to shutdown         | 1.8 s |
| 3 | ✓ answering Yes hides the rest of the form and shows a notice | 2.0 s |

| # | TEST                                           | TIME  |
|---|------------------------------------------------|-------|
| 1 | ✓ return to input data, then recalculate       | 4.4 s |
| 2 | ✓ back from a shutdown record returns to input | 2.7 s |

Positive Iso Risk All passed

7 tests — 7 passed

| # | TEST                                                                      | TIME  |
|---|---------------------------------------------------------------------------|-------|
| 1 | ✓ positivIsoRisk=no hides picker and shows posIsoNotice                   | 3.4 s |
| 2 | ✓ positivIsoRisk=no forces Category I for any group                       | 9.0 s |
| 3 | ✓ positivIsoRisk=no output shows "No" for positive isolation risk field   | 2.7 s |
| 4 | ✓ positivIsoRisk=no takes priority over all other rules                   | 3.5 s |
| 5 | ✓ positivIsoRisk=yes shows the valve picker (spadeOption always hidden)   | 1.9 s |
| 6 | ✓ positivIsoRisk=yes output shows "Yes" for positive isolation risk field | 2.9 s |
| 7 | ✓ back from positivIsoRisk=no path and recalculate                        | 3.2 s |

Smoke All passed

2 tests — 2 passed

| # | TEST                                                 | TIME  |
|---|------------------------------------------------------|-------|
| 1 | ✓ page loads with title and populated fluid dropdown | 1.1 s |
| 2 | ✓ happy path reaches output and shows PDF button     | 3.3 s |

Temperature All passed

6 tests — 6 passed

| # | TEST                                                     | TIME  |
|---|----------------------------------------------------------|-------|
| 1 | ✓ non-hazardous (G4) above 50 °C escalates to Group 3    | 3.7 s |
| 2 | ✓ above 60 °C escalates to Group 1                       | 3.6 s |
| 3 | ✓ below -10 °C escalates to Group 1                      | 3.2 s |
| 4 | ✓ normal temperature does not escalate                   | 2.6 s |
| 5 | ✓ temperature never downgrades a more onerous base group | 3.0 s |
| 6 | ✓ standard dropdown fluid infers its group               | 2.6 s |

| #  | TEST |                                                             | TIME  |
|----|------|-------------------------------------------------------------|-------|
| 1  | ✓    | Next is hidden until a title is entered                     | 1.2 s |
| 2  | ✓    | Next appears only after all six questions are answered      | 2.1 s |
| 3  | ✓    | questions are revealed one at a time                        | 2.5 s |
| 4  | ✓    | missing fluid is rejected with a modal                      | 3.4 s |
| 5  | ✓    | missing operating temperature is rejected                   | 3.5 s |
| 6  | ✓    | missing duration is rejected                                | 3.5 s |
| 7  | ✓    | "Other" fluid requires a name                               | 3.1 s |
| 8  | ✓    | red borders are cleared when fields are corrected           | 3.4 s |
| 9  | ✓    | unanswered question row is highlighted red                  | 3.0 s |
| 10 | ✓    | stage 2 requires line description                           | 3.8 s |
| 11 | ✓    | stage 2 requires isolation selection when picker is visible | 2.9 s |
| 12 | ✓    | section-error class is cleared when isolation is selected   | 3.9 s |
